## Improve assisted walking with the new Robotic Trainer

The **LEXO**® can accelerate your rehab

- ✓ Higher volume of steps per session, up to 5 times greater.
- ✓ Higher intensity within session to improve walking efficiency and cardiovascular endurance.
- ✓ Adjustable walking parameters that can be individually tailored to assist in alignment and symmetry.
- ✓ Real time biofeedback optimising precision in walking training rehabilitation.

The **LEXO**® is revolutionising gait rehabilitation for those for those living with stroke, brain or spinal cord injury, Multiple Sclerosis, Parkinson's Disease, Cerebral Palsy and many other neurological conditions.
