Individually tailored program to improve your mobility and independence.

- ✓ 6 weeks of intensive therapy with our specialist neurological therapists.
- ✓ Building mobility and independence in everyday tasks like getting in and out of bed and standing through to walking, running and returning to sport.
- ✓ Access state-of-the-art lower limb robotic and gaming technology, including the Lexo® Robotic Gait Trainer.

The **Stand. Walk. Run** program is suitable for all abilities and is most suitable for people presenting with symptoms following a stroke, brain injury, spinal cord injury, FND and Parkinson's.
